Price: \$60.00

Short Description

A modern, detailed guide to Israeli herpetofauna.

Description

A Field Guide to Reptiles and Amphibians of Israel presents useful information on the identification and general biology of all 92 terrestrial reptile and amphibian species occurring in Israel. The book details each species with an updated textual description, colourful images, and distribution maps. Species inhabiting sandy habitats are addressed in a special chapter detailing their tracks and how to follow them, with the aid of text and photographs. In addition to its species coverage, this book also covers Israel's unique conservation issues, and surveys its diverse phytogeographical habitats, with the aid of illustrations, photographs and textual information.

Aviad Bar and Guy Haimovitch. 246 pages. 2012. Softcover. ISBN - 9789659188000
