Price: \$100.00

Short Description

An interesting title providing information on the authors experience in Africa.

Description

Frog Search: Results of Expeditions to Southern and Eastern Africa is an authoritative book, which is the culmination of the author's enterprising field expeditions in southern and eastern Africa undertaken between 1993 and 1999 and his many years of dedicated research and knowledge on the frogs and toads of Africa.

The main part of the book is dedicated to the species recorded, providing very detailed accounts including information on identification (including descriptions of adults and larvae), voice, breeding & development, behaviour, biogeography and distribution. Includes 10 new species descriptions.

Martin Pickersgill. 575 pages. 2007. Hardcover. ISBN - 9783930612802
