Product Code: 48
Availability: 1
Weight: 590.00g
Dimensions: 22.00cm x 15.00cm x 2.00cm

Price: \$75.00

Short Description

A comprehensive guide to the amphibians and reptiles of the Western Sahara.

Description

The Amphibians and Reptiles of the Western Sahara is another brilliant publication from Chimaira and Serpent's Tale. It features the quality that has become customary for these publishers, including a huge array of colour photographs, detailed descriptions of all of the known species, line drawings, distribution maps and a host of other relevant information.

"The present book, with its maps, its beautifully illustrated species accounts and its identification key, but also with its concern for species conservation, will certainly form the basis for any further progress in the herpetological exploration of the Western Sahara, but is relevant also for neighbouring areas in southern Morocco, northern Mauritania and western Algeria. Therefore, authors and publisher are to be congratulated for this book." **Prof. Dr. Wolfgang Bohme.**

Philippe Geniez, Jose Antonio Mateo, Michel Geniez and Jim Pether. 230 pages. 2004. Hardcover. ISBN - 3930612674
