30.00mm

Price: \$160.00

Short Description

A complete guide to the herpetofauna of the former Soviet Union and Mongolia.

Description

The Reptiles of Northern Eurasia presents up-to-date information on all the species and subspecies of turtles (7 species), lizards (112 species) and snakes (74 species) inhabiting the territory of North Eurasia (former Soviet Union + Mongolia). Detailed geographic distribution information, with schematic maps, data on type localities and conservation status (IUCN and regional Red lists, CITES, Bern convention) are included in each species account. The present atlas can be used as illustrated reference manual of the reptiles of North Eurasia. The data provided could serve as a basis for Global Reptiles Assessment (GRA). More than 400 colour illustrations are included in the atlas (photos of reptiles, habitats and maps).

Natalia B. Ananjeva, Nikolai L. Orlov, Roman G. Khalikov, Rya S. Darevsky, Sergei A. Ryabov, Andrei V. Barabanov. 250 pages. 2006. Hardcover. ISBN - 954642269X
