15.00mm

Price: \$65.00

Short Description

A guide to the turtles and tortoises of Africa, Europe and Western Easia. Features over 450 colour photographs.

Description

Turtles of the World: Volume 1 - Africa, Europe and Western Asia has been completely revised and expanded! It portrays all valid taxa of chelonians inhabiting Africa, Europe and Western Asia. It ranges from the widely popular representatives of the genus *Testudo*, via marine and freshwater turtles, to the colorful tortoises of Africa. Aside from a representative photographic portrayal of every species, this volume also provides photographs detailing characteristics of carapace and plastron, mating, ovi-position, hatching, and of course shows a selection of natural habitats, added to which are 61 full colour distribution maps. Each photographic account is complemented by a symbol based descriptive summary of the individual husbandry requirements of the respective species in human care.

Containing 590 full colour photographs (of which 370 are new as compared to the first edition) this revised volume is a unique photographic reference for both the scientist and the terrarium enthusiast and at the same time a fascinating synopsis that makes every reader aware of the beauty of chelonians.

Holger Vetter. 152 pages. 2011 (second edition). Hardcover. ISBN - 9783930612277
