Weight: 1,840.00g

Dimensions: 240.00mm x 170.00mm x 40.00mm

Price: \$130.00

Short Description

A comprehensive guide to the natural history and captive husbandry of Asian pitvipers

Description

Asian Pitvipers: Breeding Experience and Wildlife documents the experiences of Dick Visser, one of the first Europeans to successfully breed Asian Pitvipers. This book is a combination of travelling experiences, long-term breeding experience (the author's as well as some other breeders') and data from the literature available. Among the photographs are some recently described species such as *Trimeresurus gunaleni*, *T. rubeus*, *T. cardamomensis*, *T. toba* and *T. phuketensis*. *Trimeresurus brongersmai*, of which only a few photographs of alive specimens have been published so far, is represented with images of various individuals. In addition, Visser has produced a series of watercolours (*Tropidolaemus*, and also *Protobothrops jerdoni*) for comparative purposes. An up-to-date checklist provided by Patrick David and Gernot Vogel, current scientific authorities on Asian Pitvipers, forms the appendix of this volume.

Dick Visser. 2015. 571 pages. Hardcover. ISBN - 9783899734508
