Weight: 3,000.00g

Dimensions: 31.00cm x 22.00cm x 4.00cm

Price: \$240.00

Short Description

A truly impressive account devoted to the snakes of Mexico.

Description

Snakes of Mexico describes all 390 species known from the country. With distribution maps to all species and more than 600 colour photographs, **Snakes of Mexico** is designed for use by researchers and conservationists as well as by Eco tourists and the general public. A truly impressive book - 3kg, almost 600 pages and A4 in size - this title is the most authoritative publication on the snakes of this region.

Peter Heimes received his PhD from the Rheinische Friedrich-Wilhelms-Universität Bonn (Germany) in 1994. He has been studying the herpetofauna of Mexico for more than 20 years.

"The amount of information the author has packed in each of these accounts constitutes a stunning achievement that would seriously tax the energies of a team of researchers, let alone a single individual. This attention to detail is what will give Snakes of Mexico value long into the present century for both snake aficionados and professional herpetologists alike." – Larry David Wilson

Peter Heimes. 572 pages. 2016. Hardcover. ISBN - 9783899731002
