Short Description

A comprehensive title dedicated to the husbandry of desert lizards.

Description

Desert Lizards: Captive Husbandry and Propagation contains specific chapters on simulating desert environments in captivity, feeding, and captive propagation. Detailed species accounts for are featured spiny-tailed lizards, horned lizards, chuckawallas, desert iguanas, collared lizards, and geckos. Each group of species has a discussion about taxonomy, natural history, care in captivity, and reproduction. With 60 colour photographs and 14 tables, the book brings together current husbandry and reproductive information as well as new data for some of the desert lizard species found in private collections.
