Price: \$95.00

Short Description

An advanced title devoted to the captive care and breeding of herpetofauna, particularly threatened species.

Description

Captive Management and Conservation of Amphibians and Reptiles is written by 70 leading authorities from around the world, representing universities, museums, conservation organisations, zoos, aquariums, and the private sector. This book is a current review of techniques for managing and breeding animals in captivity for purposes of conservation. The emphasis is on endangered species, special and new techniques, and on diagnosing problems, although the coverage is comprehensive and includes a broad array of issues.

James B. Murphy, Kraig Adler and Joseph T. Collins. 408 pages. 1994. Hardcover. ISBN - 9780916984335
